### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the claims are allowable over the prior art of record because the prior art fails to show or suggest, either singly or in combination thereof, a vertical hollow rigid tubular support post having a series of circumferentially-spaced vertical grooves and ridges on its outer surface; a yoke having a horizontal plate for attachment to the underside of a boat seat and a generally centrally located annular section extending below the plate, the section having a generally smooth external surface. A hollow tubular insert is telescoped within said tubular support post at the upper end of the post, the insert having a generally smooth interior annular surface. The yoke annular section is telescoped within the insert interior annular surface; the insert having an extension at its upper end overhanging the top end of the support post and extending at least partway down the exterior of the support post, the interior surface of said overhang having a series of circumferentially spaced vertically disposed ridges and grooves engaging the corresponding grooves and ridges on the support post for locking said insert from rotation with respect to the support post. The exterior surface of said overhang has a series of vertically disposed circumferentially spaced ridges and grooves. A locking plate is mounted in said yoke to move radially with respect to said yoke annular extension, the locking plate having a series of vertically disposed spaced-apart ridges and grooves on an inner side for releasably engaging the corresponding ridges and grooves on the outer

surface of the insert overhang. An elongated lever arm is pivotally attached to said yoke and extends outward therefrom, the elongated arm coupled to the locking plate for selectively moving the locking plate radially out of engagement with the insert overhang for allowing the yoke to be rotatably moved with respect to the support post.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
